Good Day,
Thank you for your time. I will be brief. Cannabis is a plant that has existed in the wild since before humanity were homo sapiens. It cannot kill the user. It actually heals and cures people of many illnesses and while it has the capacity to be abused and cause people who are preconditioned to have certain mental ailments, the only way to combat both that issue in society as well as the black market and other innumerable sufferings, is to completely legalize the use, possession and growing of certain small amounts relative to the average user. We can all work together to heal the wrongs which were first established in the 1930s for anti immigrant reasons and then solidified in the 1970s for anti communist and anti black american sentiment. Together we can see a brighter future
One Love,
Joseph Minton
