I'm writing this email to support and ask that you pass SB 113. I am a social work intern at 'r Kid's Family Center and believe all people have a right to information about themselves. My first love, a man I dated for four years, was an adoptee and knowing him grew my understanding of some of the struggles in being an adoptee. It is a basic human and civil right for every individual to know their own biological origins. If state officials are allowed to view the birth certificate of an adoptee, but that individual can not view it, what kind of power dynamic are we demonstrating to the public? Please know that I am fully in support of this bill and believe the legislature should approve Senate Bill 113.

Most sincerely,
Nava Cotton
