

Please support and pass SB 113!

I am an adoptee, and I do not have access to my own Original Birth Certificate.

Access to one's own original vital records is a human and civil rights issue. Adoptees who are legal adults should have equal access to copies of their original vital records just like everybody else, without additional burdens of special conditions, restrictions, redactions, requirements to ask others for permission, or fees in excess of what non-adoptees pay to get theirs. Equal treatment under the law means adoptees should have their rights restored as they had been before their original birth records were sealed.

Thank you for your time and consideration.

Sincerely,

Kris Gilbert
