

This testimony is in support of SB 113. I am not an adoptee but my wife is, and I initially did not feel I was qualified to comment. After reading some of the testimonies submitted, I realized that I should, because it affects me and other immediate family members. Our children cannot complete requests on medical forms because half of their medical history is unknown. This is unfair, and can potentially prevent preventative measures that they might take to avoid hereditary medical issues. Please support and pass Senate Bill 113.

Respectfully,

Bruce Hawes
