Good Day,

As a spouse of an adoptee, I am writing to urge support for SB 113.

I have read through the bill and information from other adoption rights groups and, like them, believe it is the best solution going forward for adoptee rights.

Particularly important is the ability of adoptees to access family medical histories, which will allow for more informed maintenance of health and well being.

I also believe that knowledge of ones origins and history is vital to the development of self understanding, and ties in directly with the nature of existence itself.

There are of course numerous other fine reasons why this bill needs to be passed and it is my fondest hope that this is the legislative body that will finally make the morally correct decision to do so.

Thank You,

James  
Newington Resident
