I am a mother of 2 vaccine injured children.

Please do not take away our rights to protect our other healthy children and prevent more damage to my injured ones. Vaccines have already caused us tremendous harm and financial burden. Vaccines cause damage, if they didn’t why is there no liability to these drug makers and the US gov paid over a billion+ dollars in 2018 to damaged children?

They are not safe nor effective for all children.

One size fits all approach to medicine does not work. Look at how many sick children there are today with neurological & autoimmunity issues.

Don’t sell us out and allow the state and drug companies control our bodies. Vaccines cause severe damage to many children.

Please wake up to this insanity. Next will be an adult schedule, and if you don’t comply, how will they punish us?
