

If you ever needed a reason as to why there should be a Religious Exemption, here is the main one.

Parents with a Pro Life stance should be able to opt out of getting cells from another human being injected into their bodies. Who knows what the effects of the DNA within those cells will be down the road, what expressions, what diseases could manifest? Since ALL vaccines have NEVER been double blind placebo safety tested, and since children have more health issues today than ever before, it's common sense to proceed with the utmost caution and our health departments should be researching and asking for those tests to be done. They should also be asking for the manufacturers to be liable for any deaths or injuries caused by the so called 'safe' vaccines, and not leave it up to the taxpayers to foot the enormous bill. Why are you not protecting us in this manner?

Thank you,

Chris Wrinn

CDC Admits Vaccines Contain 'Aborted Human Fetus Cells'

Published on December 5, 2019

Written by Baxter Dmitry

In a PDF on the CDC website titled "**Vaccine Excipient & Media Summary**," the CDC lists all the excipients (often referred to as bulking agents or fillers) being used in vaccines that are currently being injected into adults and children across the country.

The list, current as of January 19, 2019, was "*extracted from manufacturers' package inserts*," according to the CDC.

To read the full, disturbing list of vaccines ingredients Big Pharma is pumping into

bodies, including “*chick embryo cell culture*” and “*formaldehyde*”, click through to the CDC website [here](#).

Natural News reports: The WI-38 cell line is widely known to be “*derived from lung tissue of an aborted white (caucasian) female fetus*,” as even the pro-vaccine Wikipedia website admits. As the **Coriell Institute for Medical Research** explains about the **MRC-5** cell line / WI-38:

The MRC-5 cell line was developed in September 1966 from lung tissue taken from a 14 week fetus aborted for psychiatric reason from a 27 year old physically healthy woman. The cell morphology is fibroblast-like. The karyotype is 46,XY; normal diploid male. Cumulative population doublings to senescence is 42-48. G6PD isoenzyme is type B.

The human fetal tissue cells have become such an issue of outrage that even the Vatican has issued a statement concerning their use, in which they address, “*vaccines containing live viruses which have been prepared from human cell lines of fetal origin, using tissues from aborted human fetuses as a source of such cells.*”

You can find the Vatican’s response [at this link](#), in which they discuss the moral and ethical issues of “*The principle of licit cooperation in evil.*”

Below, you’ll find the complete list published by the CDC, de-duplicated and sorted alphabetically. Notice that these ingredients include toxic metals (aluminum salts), bizarre animal cells from humans, monkeys, cows, pigs and chickens, ingredients derived from GMOs, the radioactive element barium, artificial coloring chemicals, excitotoxins such as glutamate, chemical cleansing agents (Triton X-100), dangerous bacterial strains (E.coli), toxic chemicals such as glutaraldehyde, thimerosal (mercury) and much more.

No one can refute any of this because it’s admitted by the CDC itself.

Here’s what happens to some children when they’re injected with vaccines containing these toxins:

Vaccines currently in use in the United States contain ingredients including “human fetus cells lines” and “African Green Monkey kidney pus cells” harvested from diseased primates, according to a bombshell document published by the CDC. The report also shows that other substances are used in vaccines manufactured for human use, including: porcine circoviruses, Thimerosal, aluminum, formaldehyde, human serum albumin, diploid human cell, human embryonic kidney cells 293, also often referred to as HEK 293, HEK-293, 293 cells, or less precisely as HEK cells, human fetal cells listed as WI-38, MRC-5, HEK293, and more. — Editor
