

HB 6441 An Act Concerning Climate Change Adaption

Dear Committee Members,

I am writing in support of HB 6441 An Act Concerning Climate Change Adaption. The world is heating up, our seas and oceans are becoming hotter and we are experiencing deadly weather events, such as the huge ice and snow storm that recently hit Texas. Our legislatures need to realize the Global Warming and the subsequent climate change is a very real threat to our economy, security and health.

Thank you,
Nicolette Doukas
