

I participated in many of the GC3 meetings last year that DEEP hosted to respond to the Governor's Executive Order Number 3.

I fully support the proposals in SB882 especially energy disclosure of energy consumption. This simple measure will, in my opinion, do much to encourage property owners to make infrastructure decisions based upon energy consumption. New Haven has many, many rental properties that need efficiency upgrades. If tenants can make decisions to rent based in part upon energy consumption data the landlord will, as a result, be encouraged to offer properties that are more efficient in order to attract good renters.

Sincerely,
/Lynne Bonnett/
