

Dear Honorable Members of the Energy Committee,

I am a concerned Greenwich voter writing to you in support of SB882 to codify in statute Governor Lamont's Executive Order #3 to achieve a 100% zero carbon electric grid by 2040. If we fail to do this we are putting our clean energy goals in jeopardy and further hurting our already overburdened communities with new pollution sources. Oil and gas plants are often sited in towns and cities that already bear the brunt of pollution from fossil fuel generation. We need to ensure that these communities receive clean, non-polluting energy that protect the public health of our most vulnerable populations.

Sincerely,
Ali Ghiorse
Greenwich, CT
