

SENATE BILL 882 - I support this bill with an amendment to include electricity generation along with supply. This amendment would address MY concern that **by only covering the electricity supplied to electricity customers, Connecticut could technically achieve the 100% goal in 2040 while still having 54 fossil fuel power plants running in the state as we do right now.** I also urge adoption of a moratorium on new fossil fuel generation.

Barbara Liston,
71 Heatherwood Dr.,
Madison, CT.
