

Dear Co Chairs and Co Vice-Chairs of the Human Services Committee,

I hope this email finds you all well.

I would like to ask for your consideration to expand SB956 so all people eligible to Husky A, B, and D have access, regardless of their immigration status.

Healthcare is a human right, and we might be a very rare case in the world in terms of medical coverage, but that does not excuse us from our duty to protect the people of our state, all people, regardless of socio economic, ethnic, religious, immigration status and more.

Please change the language to expand safety and security to all husky eligible people regardless of their immigration status. This has been an urgent matter and is even more now, considering the conjuncture.

Kind regards,

Rep. Michel (he/him)

CT State Representative for the 146th House District
