

After reviewing the proposed Senate bill 842 I felt compelled to reach out and indicate why I am NOT in favor of a state run / controlled health care plan.

Constructed with good intentions, the proposal allows for a vaguely described and poorly thought out plan to control yet again insurance.

- “Health Care Cost Containment Committee – vague and open ended.
- Control via a Comptroller- lack of real oversight
- Establish yet another committee and hire even more state workers. Section 442 -562 are all administrative add on’s

I could go on, however a simple NO would not due.

Government should not be in the insurance business. Let’s stick to making laws.
