

Honorable Congressmen and Senators of Connecticut ,

The Democrat bill SB8421, designed to Control Healthcare Insurance for the people of our great State, is not a good proposal. The Nature of Health Care administration should not, and ought not, be a 'one size fits all'. Health Policy executed by a delegation of government bureaucrats remote from the Doctor-Patient of concern is not a promising situation.

The nature of healthcare is an individual to Doctor relationship that is already interrupted by Insurance Representatives yet can be contested and argued for appropriateness . Government Control will disallow appeal and arbitration; will further complicate and diminish relative requirement of particular Medical Services. Some major ensurance that the patient will be treated as a patient and not a classified number would have to be guaranteed and would be clearly impossible.

Unless some Miracle that Guarantees could Contracted I say No to SB 8421.

Yours Respectfully

Thomas Belmont, Citizen of Connecticut.
