

To whom it may concern:

As a Health care provider, I am totally opposed to government run health care! since Obama care (government run), the cost of health care even through one's employer has skyrocketed and the benefits are less—Huge deductibles, additional co-insurance, and higher copays. Plus limited selection of pharmacies. Our previous governor already cut what Medicaid (state-run) pays providers for services. Twice! Since CT has very little to offer in the way of jobs, and certainly taxes people outrageously, the few people who have jobs and actually contribute to the tax base(compared to the growing number of individuals who are living on state funded programs) cannot reasonably cover this cost! If not for the pandemic and the migration of New Yorkers who have been fleeing the city, the real estate market would have remained dead. What will happen when Covid is over and they all want to unload the properties?

Please be financially responsible! The money you hand out belongs to individual taxpayers and we are already angry that CT has gone from a state in the "black" to basically bankrupt!

Laura Shackelford, Ph.D.
