

Good Morning,

We are 19 year Connecticut residents at the writing of this email. We are reaching out to strongly oppose SB 842. We believe that a strong private business sector is key to the economic recovery of Connecticut. The competitive marketplace is far better for the development of viable insurance solutions versus additional government involvement in the lives of citizens. Additional job loss via loss of the private insurance industry is also unacceptable. One needs to look no farther than the DMV and Social Security to see how profoundly inefficient operations become when removed from the private sector and placed in the hands of the government.

Thank you for your attention,

Tom & Michele Burke - Weston
