

Dear Sir:

I respectfully object to the CT government taking over health care. CT needs jobs. CT does not need to assume the costs and the losses that will come with universal health care.

I realize the hearing was yesterday, but still wanted to register my concern.

It is ideas like this that have undermined the economy and attraction of this state for major businesses. So long, General Electric. It is ideas like this that have led to the state losing population in recent years while almost all other states are growing. Only NY made itself so unattractive during the pandemic that CT looked better by comparison to some who wanted to purchase homes.

We have a state that is blessed with so many assets and potential for growth. Please don't take another step in dragging us down. Do you really want to do this to your state?

Doug Christgau
