

We must have health care available and affordable for all. I stress this because I feel our tax dollars are better spent on health than excessive / misdirected military spending . In polarized political times when party lines tend to be divided and elected officials are bantering over public policy and employing misinformation to assuage their constituents that ' the other party' is squandering their tax dollars on folks that don't deserve it'. Just remember the people that handle our food , clean buildings, are low level workers in hospitals / nursing homes/ jails etc. We cannot have a healthy ecosystem when we ignore the basic tenet that all lives interface. The poorest , including undocumented , do not have a voice. But they actually do through you , our elected officials.
