

Good evening my name is Gavin Curran and I'm an organic farmer in Connecticut urging the committee and legislature to support SB 842 to create a public option in the state!

I was kicked off my healthcare plan during the beginning of the pandemic due to a loss of employment, we can no longer tie access to the medical system to our place of work. Our current system is immoral, unjust, costly and nonsensical.

I believe we urgently need universal comprehensive healthcare, however this bill would be a significant step towards decommodifying what I believe should be deemed a human right!

Thank you for your support for this important piece of legislation.
