

We are sick and tired of the Democrats trying to take away our employer plans and force us all into a government controlled system. Don't you see what Europe is like, long lines for any surgery's and common doctor visits. Why don't you politicians get off your golden health care systems and get on Medicare or medicaid then maybe you would see the disaster you are trying to put on us. I worked 35 years for Verizon and don't plan to leave it for a God awful alternative that you smug politicians can come up with. Dave & Ann Marie Curtin ps of course you will not include union members in your plan. They will get a pass because of the money they provide for your elections.
