

I am against the state of CT government run insurance. Leave our insurance alone! Leave companies that provide insurance for their employees alone. Our costs went up under the affordable care act, and never came back down. The cost continues to rise each year. I do not want insurance costs to go up, and I don't want what coverage we have to be reduced. I am on medicine for the rest of my life. My husband is battling stage 4 cancer, and I thank God he has health insurance coverage through his job. Cancer is very expensive to treat. We have a sizable deductible and cannot afford any more costs. Please keep your hands off our health insurance.

Sincerely,  
Lynn Dobi, Naugatuck,Ct
