

Hello

My name is Kim Fischer and I live and work in Connecticut in the medical field. I believe the democratic plan will destroy a lot of jobs in Connecticut and monopolize the people of our state. In the office that I work in to treat a patient with Medicare we get approximately \$30 a appointment. We rely on the private insurance companies to subsidize the difference whether it's \$48.50 from anthem or \$63 from United Health Care if we go with a plan like the Democrats are proposing we would probably be paid \$30 an appointment across the board hence not having enough money to pay for office expenses and we would have to close our office and put people out of work. Also in the office I work at it is a chiropractic office we cannot see Medicaid or title 19 people because the government does not allow them to see chiropractic doctor that is not in a clinical setting so if more people are treated this way we will have fewer patients and people will not be able to get the help that they need because when you live in a small town there are no clinical settings that they require a patient to go to for these chiropractic. This would that's a lot of hardship for a lot of patients. Thank you for taking time to hear my story Kim Fischer 860-459-8897
