

I oppose SB842. It is not the State's responsibility or charter to provide health insurance to State residents. This is another expansion of State government beyond the purpose of State government. Further, it will be a detriment to employees of private insurance carriers.

State government in Connecticut has failed miserably in managing the finances of this State. Do you really think you can manage public health insurance? The Democrat party is fully to blame for bankrupting Connecticut. Start accepting responsibility for the fiscal ruin you have caused and stop proposing legislation such as SB 842. Again, I am opposed to SB 842.
