

Are you all crazy in the state senate. We do not need insurance from the state. Everything the state takes over ends up in a very expensive non-working event. We will lose jobs in the state, many doctors will refuse the insurance and where will the people covered by this insurance be. They will have expensive costs that they do not have today. Already there are a lot of doctors no longer taking medicaid state insurance. What makes you think your plan will be better.

Betty Goddard
