

No to SB 842 !

The state should not be in the insurance business. AccessHeathCT is a program that is a disaster. Matt Lesser who is pushing this has no experience in healthcare and is only trying to help his friends at the Community Health Center(s) get additional funding. CHC gets millions in federal and state aid to provide free healthcare services and there is also the Husky program. How many programs are we going to find? We don't need another program.
