

I would like to speak against any proposal to create government-run health care in what is left of our great State.

I am a small business and work with many small businesses within my accounting practice. As was originally predicted, the cost of health care has gone up drastically since the creation of Obamacare. It has gone as far as driving up the cost of private health insurance plans and leaves most of us with no choice but the exchange and once you reach a very high deductible, you still have to pay a 20% co-pay. In 2020 our family paid out over \$36,000 between the premiums which were a little over \$18,000 and our deductible and medicines which were another \$18,000. The premiums have gone up considerably each year and we have had to find new doctors due to the fact that some practices do not participate with the exchange.

Please do not allow the government to get more involved with our health plans.
