

I do NOT want Government run Healthcare, a single payer system, or the Government involved in my family's health care decisions AT ALL. I'm tired of tax increases with ZERO return in this state, leveraged on the backs of the middle class.

My husband and I are engineering managers at Sikorsky/Lockheed Martin and without a doubt we will move our family out of this state if this occurs. I will even relay this the next time I have an opportunity to speak with Sr. Leaders at the company and HR representatives.

We are already looking at communities and schools in other states that have more freedoms in the face of this politicized pandemic.

There are so few reasons to remain in CT, other than familiarization and the annoyance of a move.

This will surely override those.
