

Hello,

I'm writing in regards to SB 842, the proposal for:

*AN ACT CONCERNING HEALTH INSURANCE AND HEALTH CARE IN CONNECTICUT.*

Given the State of Connecticut's history of financial mismanagement, I have serious concerns that this program will become another financial burden on the part of the taxpayers. I can barely afford to live in this state as-is.

Do we not already have the Connecticut Health Exchange and the Husky programs to cover the residents in this state, why do we need another program?

It is my guess that this proposal is in an effort to placate to the State Employee Unions, as compensation for the financial and campaign support they contribute.

If the individual reading this email is one that falls into this category, I please ask you to consider the financial obligation to the taxpayer. We both know that this program will not "pay for itself" and will require a bailout.

Thank you for your time.

Sincerely,

-Bill

Vernon, CT
