

Greetings!

I am writing to show my support for a public option in Connecticut. I deeply know that healthcare is a basic human right and feel someone should not have to sell their home to receive medical treatment. I personally have been held hostage by the greedy, parasitic realities of our Medical Industrialized Complex . I have been charged over \$3000 for a 30 day supply of Uceris to treat ulcerative colitis. I had to withhold treatment due to high deductible insurance. I have dealt with horrible service and had paid thousands of dollars with no way of shopping around. In other words, our healthcare industry is an incompetent freak show. Statistics show that Americans pay about twice as much for healthcare as our Canadian brethren, but Canadians live on average a few years longer. Most countries have governments that keep the pharmaceutical industry under control. We pay to research medicine for the rest of the world since our government takes money from the pharmaceutical lobby. It's time to stand up against this injustice!

VOTE FOR THE PUBLIC OPTION ASAP BEFORE MORE PEOPLE DIE FOR THE INSURANCE INDUSTRY TO MAKE LOTS OF MONEY!
