

Dear Legislators,

Connecticut is already burdened with monopolies: Eversource, Optimum, Frontier, just to name a few. Instead of an open, free marketplace, which promotes competition, these monopolies offer poor service, absurdly high costs, and minimum customer service.

Your proposal to do the same with the health care of CT citizens, who already pay among the highest taxes in the country, will inevitably cause the same scenario as with the above mentioned utilities.

Most of us are satisfied with our healthcare.

Some of you have been in Hartford too long and seem to have some notion you need to rule all aspects of our lives. We are not children. We are responsible adults.

We live in a constitutional republic, mandated federally and in our state constitution. There are rights inherent in these constitutions.

Therefore, I write to you to oppose the SB 842.

Respectfully submitted,

Angela R. Kelleher
