

Hello to whom it may concern,

I am a small business owner, currently owning 3 businesses and two of which are my primary source of income. I know many people will say that they cannot afford to allow Connecticut to offer a public option for health insurance. I support S.B. 842 and hope that you will too. This is the year 2021, and I hope we all know that this is the future of this country, and the world. It is embarrassing that every other major country is already doing this, and capitalism is forcing prices up astronomically. I believe this will create thousands of jobs, not take them away.

Please consider supporting S.B. 842.

Christopher MacCoy
