

How disappointing to read the desire to bring state run health care to Connecticut. As everyone knows government run healthcare plans have not only been a disaster for the people (think Veterans administration) but will take away choice and freedom for people. Not to mention the cost of implementing such programs but the continuous drain on the budget as it will spend much more than it will take in, therefore, putting the state economy in jeopardy. We are beginning to see the economy finally starting to bounce back, why would you want to add more money- draining programs? No one wants state run healthcare, we like what we have, why mess with an unbroken system.

And will the legislators also willingly and gladly go on such a state run healthcare plan?

Say NO to SB 842!
