

We vote no to SB 842. There is no benefit to the citizens of this state who are already overburdened with taxes and the creation of yet another government run bureaucratic agency is ridiculous. Obama care drove our private health care insurance cost up by hundreds, if not thousands, of dollars and we did not get any extra care, benefit or services. Why don't you work to get health care costs down, that would actually benefit all citizens. Reduce statewide spending and reduce our sales and income taxes that would also directly directly benefit all citizens. Balance the state budget, don't create more state jobs that are absolutely not necessary.
