

NO to SB 842

Please vote against this bill! Expenses in CT including insurance are already high, and on my income it is difficult enough to pay my bills and cost of living. Lowering our health insurance premiums can be done efficiently without

over- burdening the tax payers of this state; we don't need more government created and controlled programs, we need more opportunity for the growth of our free enterprise system, which has proved itself time and time again to be the best way to ensure the success of Americans!
