

Testimony:

Every time the government tries to do healthcare, my insurance premiums go up, procedures covered become fewer, and my co-pay goes up! I currently pay nearly \$9,000/yr.; I know that my money covers other people also, but I can't afford to cover anymore people!!

Doctors and hospitals have to be convinced that their fees can't continue to skyrocket. DPH or someone has to monitor to make things fair and they can't even keep the virus at bay currently. I have NO faith in CT to conduct a program of this magnitude!
