

NO TO SB 842

Let me see if I have this right. Connecticut is loosing jobs, population and only Illinois and New Jersey have higher per capita unfunded public pension liabilities and the solution to this is “if you like your doctor you can keep your doctor”; “if you like your plan you can keep your plan”; “everyone will see a \$2,000 reduction in their insurance premiums.” Connecticut has the eighth highest average health insurance premiums for State employees in the nation with the state picking up 86% of the tab as well as a looming \$2 billion deficit next year so the solution is to create another massive government program with the customary inefficient government bureaucracy to suck more oxygen out of the already declining private sector so we can drive more businesses and individuals out to lower tax states that are run by fiscally responsible governance.
