

To whom this corners.

The government was not created to run our lives. I am completely against a government ran healthcare system.

This country was created on freedom of choice, to work hard for what you want and to be able to make your own choices.

The government has proven time and time again that they have failed in trying to run a business.

Hire taxes and "mandated" government ran healthcare is a trait of a dictatorship not a democracy, and I will not have any part of it.
