

Hello,

I support a public option. I am currently on state health care due to losing my job and my peace of mind far exceeds any private insurance plan. I would happily pay the same for this as any private insurance.

I've had necessary care denied by private insurers. I've had to jump through nonsensical hoops: phone calls, faxes, emails, appointments... Steps that are utterly absurd to demand of someone who is looking for HELP. My story is not uncommon, as I'm sure other's testimony will confirm.

The people of CT have a right to accessible health care. The private market has repeatedly failed to deliver that basic need and we cannot afford to wait for them any longer.
