

Please do NOT create a government healthcare system. This type of healthcare system would make it take 2-4 times longer for us to get health care, we would not be guaranteed quality healthcare. As a working person, I and every other worker would be required to pay the healthcare costs for those that don't work (like we don't pay enough in taxes now). I know people who have this type of healthcare in Massachusetts and they hate it because it doesn't work correctly.

Please reject Bill SB 842.

Thank you,

Cindy Phillips
