

I am not in favor of this program. I'm a senior citizen with Medicare and retiree health care from my spouse. I fear losing this coverage because of health issues. My husband worked many years and contributed to the coverage cost in order to have supplemental coverage in retirement. It should not be taken away. We paid our share and we can't afford to contribute to a government run plan. Democrats are committing to too many ideas that will cost citizens in the long run. It has to stop somewhere.
