

Dear Members of Insurance and Real Estate of the Connecticut General Assembly,

I implore you to please support CT Public Option bill S.B. 842. It is now more than ever that we need a public option. As COVID19 has devastated this country as well as killing millions of people globally. COVID19 has highlighted the disparities facing many people especially the BIPOC community. Numerous people have lost employment and subsequently their medical insurance through no fault of their own. There is a great need for a public option and it is more evident now than ever. Most importantly, affordable healthcare is a human right and all people should have access to it.

You were elected to be a voice for the people. We need you to listen and hear our voice and to do the will of the people as you were elected to do. Thank you for listening and acting on behalf of the best interest of people in Connecticut.

Thank you,  
Kimberly Rice
