

To whom it may concern,

I have no interest in a government health care plan. Once we have converted to it we will be stuck with it. What we need to concentrate on is making health care affordable for all, not just make free. The lobbying groups that control our medical procedures, drugs and medical equipment have driven the cost of health care off the charts in the name of profits. Another aspect that would eliminate unnecessary costs to health care providers is to standardize how insurance carriers handle submissions and payments for those providers.

Thanks for listening, Bill Rose
