

We've already seen this show and we refuse to see it again. Americans suffered under the inept Obama administration's attempt to strip us of our right to control our own health care and we **WILL NOT** give up that right ever again.

The one-party rule in Connecticut has delivered crushing debt beyond belief, cronyism that benefits its political allies to the detriment of the rest of the citizens and an out migration that supersedes any we've ever seen before.

The "ruling" party is arrogant, unwilling to even discuss ideas presented by the other party and completely incompetent to be allowed anywhere near the health care system in Connecticut. This used to be the "insurance state" of which we were justifiably proud but now it's just another failed experiment in government manipulation to benefit the few.

This bill cannot be allowed to pass. We the citizens who provide the funds which support these people who pretend to represent us in Hartford will **NOT** have it!
