

I oppose SB 842 and the proposal to expand CT healthcare controls to the entire population. The private sector can give better options and lower cost. Take the State DMV for example, does it run like an affordable well oiled machine? No that's why it's a universally known bad experience to need to visit the DMV. I don't want our States health care system to turn into an organization like the DMV. I want choice and competition in my health care providers. Vote No to keep the government from having full control of my familys health care.
