

I am totally apposed to a government run healthcare system. A simple look at the veterans health care system will show you what we would be in for. Waiting for care, care withheld so we would die before receiving the care, letting people suffer and die . I know a person who lives in Canada and because of his age, he was on a 7 year waiting list for a knee replacement. He paid 100,00.00 to move his place up in line. That is what we would be heading for. Gov't. run healthcare is simply income redistribution and a way for the government to control you. Once they decide who gets care and who doesn't, they have total control of your life. I'll take care of my own life and I don't want or need government interference. Because of insane ideas like this one, as soon as I retire in 11 months, I'll be moving to Florida to join other Family members in a state which still resembles the America I grew up in. You can keep Communist Connecticut. I'll take my life and my tax dollars to a better state. And believe me, I am not alone in this choice. The last one to leave CT, turn the lights out.

We became the greatest and most prosperous nation in the history of earth because of the capitalist system. The Democrats want to push us into a socialist form of government under which the ruling class will live in luxury and the rest of us will live in poverty. Screw them !!!
