

No to S.B. 842

The State of Connecticut should not intrude on individuals' health insurance. Another mismanaged state run agency will increase taxes for families already suffering while creating yet another wasteful state run bureaucracy.

Connecticut is among the highest taxed states in the country. Beginning in January Connecticut added another tax, FMLA. Recently the carbon emissions TAX was enacted adding .31 to .61 cents per gallon of gas. How is charging more for gas going to lower emissions? This is another state slush fund to balance the budget. Poor management.

I have lived in Connecticut for 50 years and only worked in Connecticut. Every year I'm paying more taxes, state and property. Connecticut joins NY, CA & IL as a state with the highest exit rate. In the near future I will be forced to move to a more tax friendly state.
