

As a New London resident, I am writing in support of SB 842.

Although I believe that the longterm solution to providing universally accessible and efficient healthcare is the creation of a single-payer system, it is urgent that we take all steps possible at this time to expand coverage for Connecticut residents.

During this time of pandemic, it has become increasingly clear that the current status quo has caused economic crisis for individuals and businesses, as well as unsatisfactory health outcomes in our communities. I am happy to see the Connecticut legislature acting to remediate the suffering.
