

David Sutherland Danbury.

We've had so much division in our state and country the last four years.

Please can we find a solution that saves jobs and will lower or at least stabilize health costs.

I'm a 42 year employee of SNET-SBC and I'm still with AT&T. My health care premiums go up every year as do my out of pocket and deductibles.

A multi-billion dollar company as AT&T is should not be making us pay anything...my point is if AT&T is complaining about cost of health insurance then it needs to be lowered but not on the backs of middle class (if such a class still exists in Connecticut)jobs
