

My state Senator, Craig Minor is emailing his constituents asking them to write in against SB 842. I disagree with Senator Minor. We MUST work to see that everyone has affordable & equal access to health care. Health care is a human right. Even those of us with private insurance struggle to pay for our insurance & medical bills. The system we have now is horrible. Private insurers deny necessary procedures to save on their (insurance company) costs, often illegally. I would be happy to discuss my family's experiences further but know that we fully support "government" health care even though we technically have "good" private insurance.
