

Dear Sir:

No to SB 842.

This proposed bill would put the State of Connecticut government in charge of everyone's health care--not a reassuring step for our state--eliminating choice for those of us who want to keep our private plans, and create insurance sector job losses, raise the cost of private and employer health insurance, and keep Connecticut behind the eight-ball again in business-attracting policies, as the state grapples with the cost overruns bound to occur.

Please do not choose this path for our state.

Thank you.

Claire Theune

Sandy Hook, CT
